

LAUNCHTIME - ROCKET LAUNCH SCHEDULE

LaunchTime for iOS is available on the App Store

An app that collects rocket launches for you is now available for iOS devices.

GUILDFORD, UK - Thursday 15 September 2016 - Available today, LaunchTime shows all available rocket launches and their details, including the mission, location, type of rocket and a link to the live stream. It will send a notification before the launch, as a reminder.

LaunchTime shows you everything that you need to know about the launches, including the live streams, location of the launchpads, details of the missions, and information about rockets. Browse future launches and get their detailed information. Always have the latest information available on your phone, so you can watch each liftoff live. It will even notify you so you won't miss the next one.

Features:

- Dedicated view to the next launch with countdown
- List of upcoming launches
- Live broadcasts of launches when available
- Details about the launches, including mission description, rocket type, launch location
- View the location of the launch site
- Notification before the next liftoff
- Today widget with the essential information of the next launch
- Dark theme
- Apple Watch support

LaunchTime is now available for free for a limited time. After the introductory price, it will be \$0.99 in the US and priced accordingly in other regions. The app is available worldwide on the Apple App Store. iPad and improved Apple Watch support are planned for a future release.
